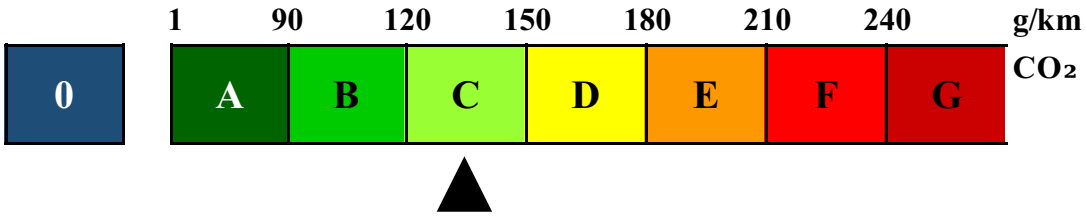
Fuel consumption and CO_2 emission of passenger cars

Marke	Hyundai
Model	Tucson
Version	1.6 T-GDi 160 DCT N-Line +Virtual + GPS + LED + ALU19
Fuel	Benzin
Getriebe	Automatik
NOx emission (g/km)	20
Fuel consumption measured according to official test cycle	**6.4 l/100km**
CO_2 emission measured according to official test cycle CO_2 is the greenhouse gas that plays the most important role in global climate change.	**146 g/km**

CO_2 emission compared to the average of all models

(with the average being 139g/km CO_2)



Year of application	2019
Test procedure	WLTP

A guide to fuel consumption and CO_2 emission with data for all models of new passenger cars is available on the website "energievreters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO_2 emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO_2 emission. See the Royal Decree of 5 September 2001.
