

Fuel consumption and CO₂ emission of passenger cars	
Marke Model Version Fuel Getriebe NOx emission (g/km)	Nissan Juke 1.0 DIG-T 114 DCT MY25 N-Connecta + Virtual + GPS + CAM + LED Benzin Automatik 0
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	0 l/100km 138 g/km
<p align="center"> CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) </p> <p> 0 1 90 120 150 180 210 240 g/km A B C D E F G CO₂ </p>	
Year of application Test procedure	2019 WLTP
<p> A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001. </p>
