

Fuel consumption and CO₂ emission of passenger cars

Marke	MG
Model	MG3
Version	1.5 HYBRID+ 194 Luxury + 360Cam + KeyLess
Fuel	+ Heated Seats + LED
Getriebe	hybride Benzine
NOx emission (g/km)	Automatik
	19.55

<p>Fuel consumption</p> <p>measured according to official test cycle</p>	<p>4.4 l/100km</p>
<p>CO₂ emission</p> <p>measured according to official test cycle</p> <p>CO₂ is the greenhouse gas that plays the most important role in global climate change.</p>	<p>100 g/km</p>

CO₂ emission compared to the average of all models

(with the average being 139g/km CO₂)

Year of application	2019
Test procedure	WLTP

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
