| <b>Fuel consumption</b><br>measured according to official test cycle<br><br><b>CO<sub>2</sub> emission</b><br>measured according to official test cycle<br>CO <sub>2</sub> is the greenhouse gas that plays the most<br>important role in global climate change.                                                                                                                                                                                                                                                                                                                                                                                            | <b>0 l/100km</b><br><br><br><b>0 g/km</b>                                                        |
| <b>CO<sub>2</sub> emission compared to the average of all models</b><br>(with the average being 139g/km CO <sub>2</sub> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                  |
|  <p>The diagram shows a horizontal scale for CO<sub>2</sub> emissions in g/km. The scale starts at 0 and increases in increments of 30 up to 240. Below the scale, a black triangle points to the 0 mark. The scale is divided into color-coded segments representing efficiency classes: 0-90 (dark blue, class 0), 90-120 (dark green, class A), 120-150 (light green, class B), 150-180 (yellow, class C), 180-210 (orange, class D), 210-240 (red, class E), and 240-270 (dark red, class F). The label 'g/km CO<sub>2</sub>' is at the right end of the scale.</p> |                                                                                                  |

| A guide to fuel consumption and CO <sub>2</sub> emission with data for all models of new passenger cars is available on the website "energieverrekeners", <a href="http://www.schoneauto.be">www.schoneauto.be</a> . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO <sub>2</sub> emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO <sub>2</sub> emission. See the Royal Decree of 5 September 2001.                                             |                                                                                                  |
