Fuel consumption and CO ₂ emission
of passenger cars

Renault Marke **Espace** Model E-TECH 200 Full Hybrid 7PL Techno + Pano + **Version** Park Pack Fuel hybride Benzine **Getriebe Automatik** 49.5

NOx emission (g/km)

4.7 I/100km

measured according to official test cycle

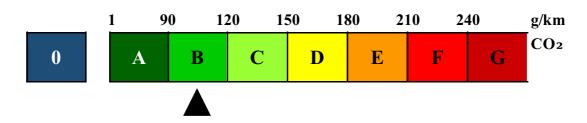

important role in global climate change.

Fuel consumption

CO₂ emission measured according to official test cycle 107 g/km CO₂ is the greenhouse gas that plays the most

CO₂ emission compared to the average of all models

(with the average being 139g/km CO₂)

Year of application 2019 Test procedure **WLTP**

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energiev reters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO2 emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO2 emission. See the Roy al Decree of 5 September 2001.
