Fuel consumption and CO2 emission
of passenger cars

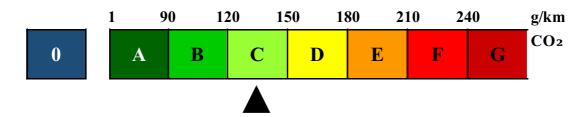

Peugeot Marke 5008 Model 1.2 T HYBRID 145 e-DCS6 GT 7pl + Sunroof **Version Pack** Fuel hybride Benzine **Getriebe Automatik** NOx emission (g/km) 28.2 **Fuel consumption** 5.7 I/100km measured according to official test cycle CO<sub>2</sub> emission

measured according to official test cycle CO<sub>2</sub> is the greenhouse gas that plays the most important role in global climate change.

129 g/km

## CO<sub>2</sub> emission compared to the average of all models

(with the average being 139g/km CO<sub>2</sub>)

Year of application 2019 Test procedure **WLTP** 

A guide to fuel consumption and CO<sub>2</sub> emission with data for all models of new passenger cars is available on the website "energiev reters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO2 emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO2 emission. See the Roy al Decree of 5 September 2001.
