

Fuel consumption and CO <sub>2</sub> emission of passenger cars		
Marke Model Version Fuel Getriebe NOx emission (g/km)	Skoda Octavia 1.5 TSI m-HEV 150 DSG Combi Sportline hybride Benzine Automatik 11	
Fuel consumption measured according to official test cycle  CO <sub>2</sub> emission measured according to official test cycle CO <sub>2</sub> is the greenhouse gas that plays the most important role in global climate change.	5.2 l/100km   119 g/km	
<div>CO<sub>2</sub> emission compared to the average of all models (with the average being 139g/km CO<sub>2</sub>)</div> <div><div>0</div><div>190120150180210240g/kmCO<sub>2</sub></div><div>A B C D E F G</div><div>▲</div></div>		
Year of application Test procedure	2019 WLTP	
A guide to fuel consumption and CO <sub>2</sub> emission with data for all models of new passenger cars is available on the website "energieverrekeners", <a href="http://www.schoneauto.be">www.schoneauto.be</a> . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO <sub>2</sub> emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO <sub>2</sub> emission. See the Royal Decree of 5 September 2001.
