

Fuel consumption and CO2 emission of passenger cars		
Marke Model Version Fuel Getriebe NOx emission (g/km)	Nissan X-Trail 1.5 T 163 MHEV DCT N-Connecta Plus + GPS + Comfort Pack Benzin Automatik 10.6	
Fuel consumption measured according to official test cycle CO2 emission measured according to official test cycle CO2 is the greenhouse gas that plays the most important role in global climate change.	7 l/100km 158 g/km	
<div>CO2 emission compared to the average of all models (with the average being 139g/km CO2)</div> <div><div>0</div><div>190120150180210240g/kmCO2</div><div>A B C D E F G</div><div></div></div>		
Year of application Test procedure	2019 WLTP	
A guide to fuel consumption and CO2 emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO2 emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO2 emission. See the Royal Decree of 5 September 2001.
