| <b>Fuel consumption</b><br>measured according to official test cycle<br><br><b>CO<sub>2</sub> emission</b><br>measured according to official test cycle<br>CO <sub>2</sub> is the greenhouse gas that plays the most important role in global climate change.                                                                                                                                                                                                                                                                                                                                                   | <b>7 l/100km</b><br><br><br><b>159 g/km</b>                                                                         |
| <b>CO<sub>2</sub> emission compared to the average of all models</b><br>(with the average being 139g/km CO <sub>2</sub> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                     |
| <p>The diagram shows a horizontal scale for CO<sub>2</sub> emissions in g/km. It starts at 0 (dark blue box) and increases in increments of 30 up to 240. The boxes are color-coded: 0 (dark blue), 90 (dark green, A), 120 (green, B), 150 (light green, C), 180 (yellow, D), 210 (orange, E), 240 (red, F), and 270 (dark red, G). A black triangle points upwards to the scale at the value 139, which is located between the 150 (D) and 180 (E) marks.</p>                                                                                                                                                 |                                                                                                                     |

| A guide to fuel consumption and CO <sub>2</sub> emission with data for all models of new passenger cars is available on the website "energieverrekeners", <a href="http://www.schoneauto.be">www.schoneauto.be</a> . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO <sub>2</sub> emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO <sub>2</sub> emission. See the Royal Decree of 5 September 2001. |                                                                                                                     |
