

Fuel consumption and CO₂ emission of passenger cars

Marke	MG
Model	HS
Version	PHEV 258 Luxury 100 KM EV Leather
Fuel	360Cam GPS LED ALU19
Getriebe	Plug-in-Hybrid-Benziner
NOx emission (g/km)	Automatik
	14.8

Fuel consumption measured according to official test cycle	0.5 l/100km
CO₂ emission measured according to official test cycle CO₂ is the greenhouse gas that plays the most important role in global climate change.	14 g/km

CO₂ emission compared to the average of all models

(with the average being 139g/km CO₂)

Year of application	2019
Test procedure	WLTP

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
