Fuel consumption measured according to official test cycle	0.4 l/100km
CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	10 g/km
<p>CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</p> 	
Year of application	2019
Test procedure	WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energievereters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
