

Fuel consumption and CO ₂ emission of passenger cars		
Marke Model Version Fuel Getriebe NOx emission (g/km)	Hyundai Tucson 1.6 T-GDi 160 DCT N-Line +Virtual + GPS + LED + ALU19 Benzin Automatik 0	
Fuel consumption measured according to official test cycle CO ₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	0 l/100km 0 g/km	
<div>CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</div> <div><div>0</div><div>190120150180210240g/kmCO₂</div><div>A B C D E F G</div></div>		
Year of application Test procedure	2019 WLTP	
A guide to fuel consumption and CO ₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO ₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO ₂ emission. See the Royal Decree of 5 September 2001.
