

Fuel consumption and CO ₂ emission of passenger cars															
Marke Model Version Fuel Getriebe NOx emission (g/km)	MG ZS Hybrid+ 194 Luxury Leather 360Cam GPS Heated Seats ALU18 hybride Benzine Automatik 17.7														
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	5.1 l/100km 115 g/km														
CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) The chart displays CO₂ emission levels in g/km. The scale ranges from 0 to 240 g/km. The bars are labeled A through G. A black triangle indicates the average value of 139 g/km, which is positioned between category B (120 g/km) and category C (150 g/km). <table border="1"> <thead> <tr> <th>Label</th> <th>Value (g/km)</th> </tr> </thead> <tbody> <tr> <td>A</td> <td>90</td> </tr> <tr> <td>B</td> <td>120</td> </tr> <tr> <td>C</td> <td>150</td> </tr> <tr> <td>D</td> <td>180</td> </tr> <tr> <td>E</td> <td>210</td> </tr> <tr> <td>F</td> <td>240</td> </tr> </tbody> </table>		Label	Value (g/km)	A	90	B	120	C	150	D	180	E	210	F	240
Label	Value (g/km)														
A	90														
B	120														
C	150														
D	180														
E	210														
F	240														
Year of application Test procedure	2019 WLTP														
A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
