

<h1>Fuel consumption and CO₂ emission of passenger cars</h1>		
Marke Model Version Fuel Getriebe NOx emission (g/km)	Kia Stonic 1.0 T-GDI 100 Spin + GPS + Winter Pack + Camera Benzin Schaltgetriebe 15	
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	<div>5.7 l/100km</div> <div>128 g/km</div>	
<p align="center"> CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) </p> <p>The chart displays a scale from 0 to 240 g/km CO₂ in increments of 30. The categories are: 0 (dark blue), 1-90 (dark green, A), 90-120 (green, B), 120-150 (light green, C), 150-180 (yellow, D), 180-210 (orange, E), 210-240 (red, F), and 240 (dark red, G). A black triangle points to the 139 g/km mark, which is located within the 'C' category range.</p>		
Year of application Test procedure	2019 WLTP	
<p> A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001. </p>
