

Fuel consumption and CO₂ emission of passenger cars	
Marke Model Version Fuel Getriebe NOx emission (g/km)	Opel Corsa 1.2T 100 GS + Winter Pack + Two Tone + LED + CAM Benzin Schaltgetriebe 0
<p align="center">Fuel consumption</p> <p align="center">measured according to official test cycle</p> <p align="center">CO₂ emission</p> <p align="center">measured according to official test cycle</p> <p>CO₂ is the greenhouse gas that plays the most important role in global climate change.</p>	<p align="right">0 l/100km</p> <p align="right">0 g/km</p>
<p align="center">CO₂ emission compared to the average of all models</p> <p align="center">(with the average being 139g/km CO₂)</p> <div style="display: flex; align-items: center; justify-content: center;"> <div style="text-align: center; margin-right: 10px;"> </div> </div>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
