

Fuel consumption and CO₂ emission of passenger cars

Marke Model Version Fuel Getriebe NOx emission (g/km)	Nissan Juke 1.0 DIG-T 114 DCT N-Connecta ALU19 Cold Pack Cam LED Benzin Automatik 23.4
--	---

Fuel consumption measured according to official test cycle	6 l/100km
CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	136 g/km

Year of application Test procedure	2019 WLTP
---------------------------------------	--------------

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
