

Fuel consumption and CO ₂ emission of passenger cars	
Marke Model Version Fuel Getriebe NOx emission (g/km)	Peugeot 2008 Hybrid 145 AUT GT Camera Keyless LED Lights hybride Benzine Automatik 16.6
Fuel consumption measured according to official test cycle CO ₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	4.9 l/100km 112 g/km
CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) 0 A B C D E F G 190120150180210240g/km CO₂ ▲	
Year of application Test procedure	2019 WLTP
A guide to fuel consumption and CO ₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO ₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO ₂ emission. See the Royal Decree of 5 September 2001.
