

Fuel consumption and CO₂ emission of passenger cars

| | |
|--|---|
| Marke Model Version Fuel Getriebe NOx emission (g/km) | Peugeot 5008 145 e-DCS6 HYBRID GT 7PL Pano Winter Pack Panoramic Navi hybride Benzine Automatik 28.2 |
|--|---|

| | |
|---|--------------------|
| Fuel consumption measured according to official test cycle | 5.7 l/100km |
| CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change. | 129 g/km |

| | |
|---------------------|------|
| Year of application | 2019 |
| Test procedure | WLTP |

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
