

Fuel consumption and CO ₂ emission of passenger cars	
Marke Model Version Fuel Getriebe NOx emission (g/km)	Citroën Berlingo 1.5 HDi 100 Camera 10" Infotainment Diesel Schaltgetriebe 0
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	0 l/100km 0 g/km
<p align="center">CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</p> <p>The chart displays CO₂ emission levels in g/km. The scale ranges from 0 to 240 g/km. The bars are color-coded as follows: 0 (dark blue), 90 (dark green), 120 (green), 150 (light green), 180 (yellow), 210 (orange), and 240 (red). The categories A through G correspond to these values: A (90), B (120), C (150), D (180), E (210), F (240), and G (240). A black triangle points to the 0 mark.</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
