

Fuel consumption and CO₂ emission of passenger cars

| | |
|--|--|
| Marke Model Version Fuel Getriebe NOx emission (g/km) | BYD Seal 6 PHEV 184 Touring Boost 50km EV Combi Range 1350km Leather Plug-in-Hybrid-Benziner Automatik 0 |
|--|--|

| | |
|---|------------------|
| Fuel consumption measured according to official test cycle | 0 l/100km |
| CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change. | 0 g/km |

| | |
|---------------------------------------|--------------|
| Year of application Test procedure | 2019 WLTP |
|---------------------------------------|--------------|

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
