

Fuel consumption and CO₂ emission of passenger cars

Marke Model Version Fuel Getriebe NOx emission (g/km)	Audi S3 333 Quattro 4D Black Style Pano Matrix MMi Plus ALU19 Benzin Automatik 14.8
--	---

Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	8.3 l/100km 189 g/km
---	---

Year of application Test procedure	2019 WLTP
---------------------------------------	--------------

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
