

Fuel consumption and CO₂ emission of passenger cars	
Marke Model Version Fuel Getriebe NOx emission (g/km)	Volkswagen Tiguan 1.5 eTSI DSG 130 Life Pano Alu17 LED Plus Winter Pack IQ.Drive Benzin Automatik 19.2
<p style="text-align: center;">Fuel consumption</p> <p style="text-align: center;">measured according to official test cycle</p> <p style="text-align: right;">6 l/100km</p> <p style="text-align: center;">CO₂ emission</p> <p style="text-align: center;">measured according to official test cycle</p> <p>CO₂ is the greenhouse gas that plays the most important role in global climate change.</p> <p style="text-align: right;">137 g/km</p>	
<p>CO₂ emission compared to the average of all models</p> <p>(with the average being 139g/km CO₂)</p>  <p>0 1 90 120 150 180 210 240 g/km</p> <p style="text-align: right;">CO₂</p> <p style="text-align: center;">▲</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
