

Fuel consumption and CO2 emission of passenger cars		
Marke Model Version Fuel Getriebe NOx emission (g/km)	Omoda 9 PHEV 537 Black Line EV range 145 Km Pano Leather Head Up 360 Cam Plug-in-Hybrid-Benziner Automatik 0	
Fuel consumption measured according to official test cycle CO2 emission measured according to official test cycle CO2 is the greenhouse gas that plays the most important role in global climate change.	0 l/100km 0 g/km	
CO2 emission compared to the average of all models (with the average being 139g/km CO2)		
0 1 90 120 150 180 210 240 g/km CO2 A B C D E F G		
Year of application Test procedure	2019 WLTP	
A guide to fuel consumption and CO2 emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO2 emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO2 emission. See the Royal Decree of 5 September 2001.
