

Fuel consumption and CO₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Volkswagen T-Roc 1.5 TSi 150 DSG Life + Carplay + Cam + LED + ALU17 Petrol Automatic 13
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	6 l/100km 137 g/km
CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)  The chart displays CO₂ emission levels in g/km. The segments are labeled with letters: 0, A, B, C, D, E, F, G. A black triangle points to the 'C' segment, which corresponds to the 120-150 g/km range.	
Year of application Test procedure	2019 WLTP
A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
