

<h1>Fuel consumption and CO₂ emission of passenger cars</h1>		
Make Model Version Fuel Gearbox NOx emission (g/km)	MG MG3 1.5 HYBRID+ 194 Luxury + 360Cam + KeyLess + Heated Seats + LED Hybrid Petrol Automatic 19.55	
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	<div>4.4 l/100km</div> <div>100 g/km</div>	
<p align="center">CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</p>  <p>The chart displays CO₂ emission levels in g/km. The scale ranges from 0 to 240 g/km. The bars are color-coded: 0 (dark blue), 90 (dark green), 120 (green), 150 (light green), 180 (yellow), 210 (orange), 240 (red), and 240 (dark red). The bars are labeled A (90), B (120), C (150), D (180), E (210), F (240), and G (240). A black triangle points to the bar labeled B (120 g/km).</p>		
Year of application Test procedure	2019 WLTP	
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
