Fuel consumption and CO ₂ emission
of passenger cars

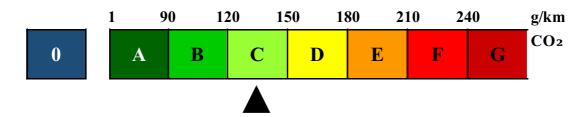

Hyundai Make Tucson Model 1.6 T-GDI 160 MHEV DCT Shine + Bi Color + **Version HUD + KRELL premium sound** Fuel Petrol **Gearbox Automatic** NOx emission (g/km) 20 **Fuel consumption** 6.4 I/100km measured according to official test cycle CO₂ emission

measured according to official test cycle CO₂ is the greenhouse gas that plays the most important role in global climate change.

CO₂ emission compared to the average of all models

144 g/km

(with the average being 139g/km CO₂)

Year of application 2019 Test procedure **WLTP**

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energiev reters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO2 emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO2 emission. See the Roy al Decree of 5 September 2001.
