

Fuel consumption and CO₂ emission of passenger cars		
Make Model Version Fuel Gearbox NOx emission (g/km)	Toyota Yaris Cross 1.5 Hybrid 130 Executive + Winter Pack + Keyless + Navi + CAM Hybrid Petrol Automatic 6.2	
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	4.5 l/100km 101 g/km	
CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) The chart displays CO₂ emission levels in g/km. The scale ranges from 0 to 240 g/km, with major ticks every 30 units. The bars are color-coded as follows: 0 (dark blue), 90 (dark green), 120 (green), 150 (light green), 180 (yellow), 210 (orange), 240 (red), and 240+ (dark red). The car's emission level is indicated by a black triangle pointing to the B category (90-120 g/km).		
Year of application Test procedure	2019 WLTP	
A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
