Automatic

49.5

Fuel consumption

measured according to official test cycle

CO₂ emission

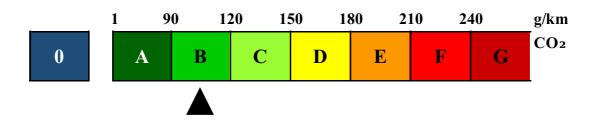

measured according to official test cycle CO₂ is the greenhouse gas that plays the most important role in global climate change.

4.6 l/100km

104 g/km

CO₂ emission compared to the average of all models

(with the average being 139g/km CO₂)

Year of application 2019
Test procedure WLTP

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energiev reters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
