Fuel consumption and CO2 emission
of passenger cars

Make Model Version Fuel Gearbox NOx emission (g/km)	Renault Captur 1.0 TCe 90 Evolution + GPS RLink + Camera + Comfort Pack Petrol Manual 46.7
Fuel consumption measured according to official test cycle	6.1 l/100km
CO ₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	137 g/km

CO₂ emission compared to the average of all models

(with the average being 139g/km CO₂)

Year of application 2019
Test procedure WLTP

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energiev reters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
