

Fuel consumption and CO ₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Kia Ceed SW / cee'd SW 1.0 T-GDi Design Edition + GPS + JBL Sound + Cam + LED Petrol Manual 24.2
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	5.4 l/100km 123 g/km
CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) The chart displays a scale from 0 to 240 g/km CO₂. The segments are labeled as follows: 0 - 1: Dark Blue (0) 1 - 90: Dark Green (A) 90 - 120: Green (B) 120 - 150: Light Green (C) 150 - 180: Yellow (D) 180 - 210: Orange (E) 210 - 240: Red (F) 240 - : Dark Red (G) A black triangle indicates the average value of 139 g/km CO₂, positioned between the green 'C' segment and the yellow 'D' segment.	
Year of application Test procedure	2019 WLTP
A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
