

<h2>Fuel consumption and CO₂ emission of passenger cars</h2>		
Make Model Version Fuel Gearbox NOx emission (g/km)	BYD Seal 6 Touring 1.5 DM-i PHEV Comfort + Pano + Leather + 15.6 Inch Screen + HiFi sound PLHYBRIDE B Automatic 0.7	
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	<div>1.7 l/100km</div> <div>38 g/km</div>	
<p>CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</p> <p>The scale shows CO₂ emissions in g/km. Categories are: 0 (dark blue), A (dark green), B (green), C (light green), D (yellow), E (orange), F (red), G (dark red). A triangle points to the 139 g/km mark, which is between category A and B.</p>		
Year of application Test procedure	2019 WLTP	
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
