

Fuel consumption and CO ₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Hyundai Bayon 1.0 T-GDi 100 AUT Twist GPS by App Virtual Cockpit Camera Petrol Automatic 14.8
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	5.4 l/100km 123 g/km
<p align="center">CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</p> <p>The chart displays CO₂ emission levels in g/km on a scale from 0 to 240. The categories are: 0 (dark blue), A (dark green, 1-90), B (green, 90-120), C (light green, 120-150), D (yellow, 150-180), E (orange, 180-210), F (red, 210-240), and G (dark red, 240+). A black triangle points to the 'C' class, which corresponds to the car's emission of 123 g/km.</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
