

Fuel consumption and CO ₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Nissan X-Trail 1.5 T 163 MHEV DCT N-Connecta Plus + GPS + Comfort Pack Petrol Automatic 10.6
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	7 l/100km 158 g/km
CO₂ emission compared to the average of all models (with the average being 139g/km CO ₂)	
<p>0 1 90 120 150 180 210 240 g/km CO₂</p> <p>▲</p>	
Year of application Test procedure	2019 WLTP
A guide to fuel consumption and CO ₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO ₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO ₂ emission. See the Royal Decree of 5 September 2001.
