

Fuel consumption and CO ₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	BYD Seal U DM-I 218 PHEV Boost Pano Leather Infinity Sound BYD App GPS Plug-in hybrid Petrol Automatic 1.2
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	0.7 l/100km 16 g/km
CO₂ emission compared to the average of all models (with the average being 139g/km CO ₂) 1 90 120 150 180 210 240 g/km 0 A B C D E F G CO₂	
Year of application Test procedure	2019 WLTP
A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
