

Fuel consumption and CO₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Volkswagen T-Roc 1.5 eTSI 150 DSG R-Line Pano Pack Black Style Easy open Pack Petrol Automatic 14.6
<p style="text-align: center;">Fuel consumption</p> <p style="text-align: center;">measured according to official test cycle</p> <p style="text-align: right;">5.8 l/100km</p> <p style="text-align: center;">CO₂ emission</p> <p style="text-align: center;">measured according to official test cycle</p> <p>CO₂ is the greenhouse gas that plays the most important role in global climate change.</p> <p style="text-align: right;">133 g/km</p>	
<p>CO₂ emission compared to the average of all models</p> <p>(with the average being 139g/km CO₂)</p> <p>The chart displays a scale from 0 to 240 g/km CO₂ with the following categories: 0 (dark blue), 1 (dark green), 90 (green), 120 (light green), 150 (yellow-green), 180 (yellow), 210 (orange), 240 (red), and G (dark red). A black triangle points to the C class (120-150 g/km), indicating the car's emission level of 133 g/km.</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
