

Fuel consumption and CO ₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Omoda 5 1.6 TGD _i 147 DCT Premium + Pano + Leather + Virtual + LED + ALU18 Petrol Automatic 16.23
Fuel consumption measured according to official test cycle 7 l/100km CO₂ emission measured according to official test cycle CO₂ is the greenhouse gas that plays the most important role in global climate change. 159 g/km	
CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) The chart displays CO₂ emission levels in g/km. The scale ranges from 0 to 240 g/km with increments of 30. The bars are color-coded as follows: 0: Dark Blue 30: Green (Label A) 60: Light Green (Label B) 90: Yellow-Green (Label C) 120: Yellow (Label D) 150: Orange (Label E) 180: Red-Orange (Label F) 210: Red (Label G) 240: Dark Red A black triangle points to the bar labeled 'D' at 120 g/km.	
Year of application Test procedure	2019 WLTP
A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
