

Fuel consumption and CO ₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Opel Corsa 145 e-DSC6 Hybrid GS + Infotainment Pack + Tech Pack Plus Hybrid Petrol Automatic 12.3
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	4.6 l/100km 104 g/km
<p align="center">CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</p> <p>The chart displays CO₂ emission levels in g/km. The scale ranges from 0 to 240 g/km. The categories are: 0 (dark blue), 1 (dark green, A), 90 (green, B), 120 (light green, C), 150 (yellow, D), 180 (orange, E), 210 (red, F), and 240 (dark red, G). A black triangle points to the value 139, which is between categories B and C.</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
