

Fuel consumption and CO <sub>2</sub> emission of passenger cars	
<b>Make</b> <b>Model</b> <b>Version</b> <b>Fuel</b> <b>Gearbox</b> <b>NOx emission (g/km)</b>	Peugeot 2008 Hybrid 145 AUT GT   Camera   Keyless   LED Lights Hybrid Petrol Automatic 16.6
<b>Fuel consumption</b> measured according to official test cycle  <b>CO<sub>2</sub> emission</b> measured according to official test cycle CO <sub>2</sub> is the greenhouse gas that plays the most important role in global climate change.	<b>4.9 l/100km</b>          <b>112 g/km</b>
<p align="center"><b>CO<sub>2</sub> emission compared to the average of all models</b> (with the average being 139g/km CO<sub>2</sub>)</p> <p>The chart displays CO<sub>2</sub> emission levels in g/km on a scale from 0 to 240. The scale is divided into color-coded segments: 0 (dark blue), 1-90 (dark green, class A), 90-120 (light green, class B), 120-150 (yellow-green, class C), 150-180 (yellow, class D), 180-210 (orange, class E), 210-240 (red, class F), and 240 (dark red, class G). A black triangle points to the 112 g/km mark, which falls within the 90-120 g/km range, indicating a class B emission.</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO<sub>2</sub> emission with data for all models of new passenger cars is available on the website "energieveretters", <a href="http://www.schoneauto.be">www.schoneauto.be</a>. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO<sub>2</sub> emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO<sub>2</sub> emission. See the Royal Decree of 5 September 2001.</p>
