

Fuel consumption and CO ₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Citroën C5 Aircross 145 Hybrid AUT MAX New Model Winter Pack Plus Matrix LED Head Up GPS Hybrid Petrol Automatic 0
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	0 l/100km 0 g/km
<p align="center">CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</p> <p>The chart displays a scale from 0 to 240 g/km CO₂. The zones are: 0 (dark blue), A (dark green), B (green), C (light green), D (yellow), E (orange), F (red), and G (dark red). A black triangle points to the 0 mark.</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
