

Fuel consumption and CO ₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Nissan Qashqai 158 MHEV AUT N-Design GPS LED ALU20 Petrol Automatic 0
<p align="center">Fuel consumption</p> <p align="center">measured according to official test cycle</p> <p align="center">CO₂ emission</p> <p align="center">measured according to official test cycle</p> <p>CO₂ is the greenhouse gas that plays the most important role in global climate change.</p>	<p>0 l/100km</p> <p>0 g/km</p>
<p align="center">CO₂ emission compared to the average of all models</p> <p align="center">(with the average being 139g/km CO₂)</p> <p>0 1 90 120 150 180 210 240 g/km</p> <p>0 A B C D E F G CO₂</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
