

Fuel consumption and CO ₂ emission of passenger cars		
Make Model Version Fuel Gearbox NOx emission (g/km)	Toyota Yaris Cross 1.5 Hybrid 130 Executive Winter Pack Keyless GPS CAM ALU17 Hybrid Petrol Automatic 8.9	
Fuel consumption measured according to official test cycle CO ₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	4.4 l/100km 100 g/km	
CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) 0 A B C D E F G 190120150180210240g/km CO₂		
Year of application Test procedure	2019 WLTP	
A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
