

Fuel consumption and CO₂ emission of passenger cars

| | |
|--|--|
| Make Model Version Fuel Gearbox NOx emission (g/km) | JAECOO J7 1.5 PHEV 347 AUT EV Range 90km Selective Leather GPS 360 CAM Head Up Plug-in hybrid Petrol Automatic 1.4 |
|--|--|

| | |
|---|--------------------|
| Fuel consumption measured according to official test cycle | 0.7 l/100km |
| CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change. | 23 g/km |

| | |
|---------------------------------------|--------------|
| Year of application Test procedure | 2019 WLTP |
|---------------------------------------|--------------|

A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.
