

Fuel consumption and CO₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Citroën C4 Hybrid 145 e-DCS6 MAX GPS Alu18 Drive Assist LED Petrol Automatic 16.6
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	4.7 l/100km 106 g/km
<p align="center"> CO₂ emission compared to the average of all models (with the average being 139g/km CO₂) </p> <p>The chart displays CO₂ emission levels in g/km on a scale from 0 to 240. The categories are: 0 (dark blue), 1 (dark green), 90 (green), 120 (light green), 150 (yellow-green), 180 (yellow), 210 (orange), 240 (red), and G (dark red). A black triangle points to the 'B' category, which corresponds to 90 g/km.</p>	
Year of application Test procedure	2019 WLTP
<p> A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieveretters", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001. </p>
