| <b>Fuel consumption</b><br>measured according to official test cycle<br><br><b>CO<sub>2</sub> emission</b><br>measured according to official test cycle<br>CO <sub>2</sub> is the greenhouse gas that plays the most<br>important role in global climate change.                                                                                                                                                                                                                                                                                                                                                | <b>0 l/100km</b><br><br><br><b>0 g/km</b>                                                                                    |
| <b>CO<sub>2</sub> emission compared to the average of all models</b><br>(with the average being 139g/km CO <sub>2</sub> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                              |
| <p>The diagram shows a horizontal scale for CO<sub>2</sub> emissions in g/km. It starts at 0 (dark blue box) and increases in increments of 30 up to 240. Each increment is represented by a colored box with a letter: 0 (dark blue, 0), 30 (dark green, A), 60 (green, B), 90 (light green, C), 120 (yellow-green, D), 150 (yellow, E), 180 (orange, F), 210 (red-orange, G), and 240 (red, H). A black triangle points to the 0 mark.</p>                                                                                                                                                                    |                                                                                                                              |

| A guide to fuel consumption and CO <sub>2</sub> emission with data for all models of new passenger cars is available on the website "energieverrekeners", <a href="http://www.schoneauto.be">www.schoneauto.be</a> . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO <sub>2</sub> emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO <sub>2</sub> emission. See the Royal Decree of 5 September 2001. |                                                                                                                              |
