

Fuel consumption and CO₂ emission of passenger cars	
Make Model Version Fuel Gearbox NOx emission (g/km)	Volkswagen T-Roc 1.5 eTSI DSG 150 Life New Model Winter Pack Cam 12.9" Screen Petrol Automatic 14.6
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	5.5 l/100km 126 g/km
<p>CO₂ emission compared to the average of all models (with the average being 139g/km CO₂)</p> <p>The chart displays CO₂ emission levels in g/km. The categories are: 0, A, B, C, D, E, F, G. A black triangle points to the boundary between C and D, indicating the car's position relative to the average.</p>	
Year of application Test procedure	2019 WLTP
<p>A guide to fuel consumption and CO₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO₂ emission. See the Royal Decree of 5 September 2001.</p>
