

Fuel consumption and CO <sub>2</sub> emission of passenger cars	
<b>Marque</b> <b>Model</b> <b>Version</b> <b>Fuel</b> <b>Transmission</b> <b>NOx emission (g/km)</b>	Toyota C-HR 1.8 HYBRID 140 Style Plus + Cloud GPS + ACC + CAM + LED + ALU18 hybride Essence Automatique 0
<b>Fuel consumption</b> measured according to official test cycle  <b>CO<sub>2</sub> emission</b> measured according to official test cycle CO <sub>2</sub> is the greenhouse gas that plays the most important role in global climate change.	<b>0 l/100km</b>          <b>108 g/km</b>
<p align="center"><b>CO<sub>2</sub> emission compared to the average of all models</b>            (with the average being 139g/km CO<sub>2</sub>)</p>  <p>The chart displays CO<sub>2</sub> emission levels in g/km. The scale ranges from 0 to 240 g/km. The bars are color-coded as follows: 0 (dark blue), 90 (dark green), 120 (green), 150 (light green), 180 (yellow), 210 (orange), 240 (red), and 240 (dark red). The bars are labeled A, B, C, D, E, F, and G respectively. A black triangle points to the bar labeled B (120 g/km).</p>	
<b>Year of application</b> <b>Test procedure</b>	2019 WLTP
<p>A guide to fuel consumption and CO<sub>2</sub> emission with data for all models of new passenger cars is available on the website "energieverrekeners", <a href="http://www.schoneauto.be">www.schoneauto.be</a>. In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO<sub>2</sub> emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO<sub>2</sub> emission. See the Royal Decree of 5 September 2001.</p>
