

Fuel consumption and CO₂ emission of passenger cars																			
Marque Model Version Fuel Transmission NOx emission (g/km)	MG HS 1.5 T-GDi 170 AT Luxury + Leather + 360Cam + LED + ALU19 Essence Automatique 0																		
Fuel consumption measured according to official test cycle CO₂ emission measured according to official test cycle CO ₂ is the greenhouse gas that plays the most important role in global climate change.	0 l/100km 173 g/km																		
CO₂ emission compared to the average of all models (with the average being 139g/km CO ₂)																			
<p>The diagram shows a horizontal scale for CO₂ emissions in g/km. The scale starts at 0 and increases in increments of 30 up to 240. Below the scale, categories A through G are assigned to specific ranges: A (0-90), B (90-120), C (120-150), D (150-180), E (180-210), F (210-240), and G (240+). A black triangle points to the 139 g/km mark, which falls within category D.</p> <table border="1"> <thead> <tr> <th>Category</th> <th>CO₂ Range (g/km)</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>0</td> </tr> <tr> <td>A</td> <td>0 - 90</td> </tr> <tr> <td>B</td> <td>90 - 120</td> </tr> <tr> <td>C</td> <td>120 - 150</td> </tr> <tr> <td>D</td> <td>150 - 180</td> </tr> <tr> <td>E</td> <td>180 - 210</td> </tr> <tr> <td>F</td> <td>210 - 240</td> </tr> <tr> <td>G</td> <td>240 -</td> </tr> </tbody> </table>		Category	CO ₂ Range (g/km)	0	0	A	0 - 90	B	90 - 120	C	120 - 150	D	150 - 180	E	180 - 210	F	210 - 240	G	240 -
Category	CO ₂ Range (g/km)																		
0	0																		
A	0 - 90																		
B	90 - 120																		
C	120 - 150																		
D	150 - 180																		
E	180 - 210																		
F	210 - 240																		
G	240 -																		
Year of application Test procedure	2019 WLTP																		
A guide to fuel consumption and CO ₂ emission with data for all models of new passenger cars is available on the website "energieverrekeners", www.schoneauto.be . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO ₂ emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO ₂ emission. See the Royal Decree of 5 September 2001.
