

<b>Fuel consumption and CO<sub>2</sub> emission of passenger cars</b>		
<b>Marque</b> <b>Model</b> <b>Version</b> <b>Fuel</b> <b>Transmission</b> <b>NOx emission (g/km)</b>	MG MG3 1.5 HYBRID+ 194 Luxury + 360Cam + KeyLess + Heated Seats + LED hybride Essence Automatique 19.55	
<b>Fuel consumption</b> measured according to official test cycle  <b>CO<sub>2</sub> emission</b> measured according to official test cycle CO <sub>2</sub> is the greenhouse gas that plays the most important role in global climate change.	4.4 l/100km          <b>100 g/km</b>	
<b>CO<sub>2</sub> emission compared to the average of all models</b> (with the average being 139g/km CO <sub>2</sub> )  <div><div>0</div><div>190120150180210240g/kmCO<sub>2</sub></div><div>A</div><div>B</div><div>C</div><div>D</div><div>E</div><div>F</div><div>G</div></div>		
<b>Year of application</b> <b>Test procedure</b>	2019 WLTP	
A guide to fuel consumption and CO <sub>2</sub> emission with data for all models of new passenger cars is available on the website "energieverrekeners", <a href="http://www.schoneauto.be">www.schoneauto.be</a> . In addition to the fuel efficiency of a car, driving behaviour and other non-technical factors also determine the fuel consumption and CO <sub>2</sub> emission of a car. Regular and good maintenance of the car in accordance with the manufacturer's instructions also promotes a reduction in fuel consumption and CO <sub>2</sub> emission. See the Royal Decree of 5 September 2001.
